My Portfolio

Summary

I am Berkant Karakayış, a driven software developer with a strong inclination towards continuous learning and collaboration within the tech community. My journey is fueled by a deep-seated motivation to tackle challenges and seize opportunities in software development, all while striving to make a meaningful impact on society and the environment.

Having graduated from Namık Kemal University with a degree in Computer Programming, I possess a diverse skill set encompassing various technologies and frameworks. From front-end technologies like JavaScript, HTML, CSS, and React to back-end tools such as Node.js, MongoDB, MySQL, and WordPress, I am proficient in building robust and scalable applications. Additionally, my expertise extends to utilizing tools like TypeScript, Material UI, Bootstrap, and jQuery to enhance user experiences and streamline development processes.

My passion for innovation extends beyond traditional web development, as I am also well-versed in Android Studio, Git, GitHub, and Arduino. Furthermore, I bring a solid foundation in data analysis and algorithm development through my experience with MATLAB.

I am eager to further expand my knowledge and skills by embracing new technologies and frameworks while actively seeking opportunities to collaborate with fellow developers and professionals in the field. Together, let's embark on a journey of growth, innovation, and positive change through software development.

Work Experience

IT Intern
Meridyen Games
June 2023 to August 2023 (1 month)

Web Developer
Freelancer
June 2023 to ~
- Making websites for customers. I'm using html, css/sass, javascirpt usually. And node.js, react, sql according to customer's request.

Software Developer
Nevera Tech
June 2023 to ~
- Making websites for customers. Company using react, react-native, typescript, mongoDB, node.js technologies.

Relevant Skills

- Arduino
- C#
- Html
- Css (Scss / Sass)
- Javascript (jQuery)
- MsSQL
- Algorithms
- VEX Robotics
- Photoshop
