ABOUT ME

Full-stack developer who has shipped 70+ iGaming production, server-authoritative multiplayer systems, and live sports broadcast graphics. Specialized in React, TypeScript, and Node.js, with hands-on production experience across microservice backends and cross-platform mobile. I build component-driven, config-based architectures designed for multi-brand products and treat maintainability, real-time reliability, and measurable performance as first-class requirements.

EDUCATION

Namık Kemal University 2021-2023 Associate's Degree, Computer Programming

Certificates : Full-Stack Development Bootcamp (Techcareer.net) , Complete Web Development Bootcamp (Udemy) , Cyber Security (Cisco Networking Academy) , Intro to AI & Algorithms (BTK Akademi)

WORK EXPERIENCE

PixupPlay • Dec 2024 – Present Dubai, UAE (Remote) • Full-Stack Developer

- Engineered a shared HTML5 Canvas engine powering 70+ production casino games with provably-fair RNG (HMAC-SHA256) and configurable RTP math.
- Owned server-authoritative multiplayer game servers in Node.js/WebSocket — reconnect-safe state, idempotent wallet settlement, 52 automated tests.
- Designed LiveTracker, a real-time broadcast graphics platform for 6 sports using socket.io + Redis pub/sub with ~1s reconnect recovery.
- Contributed to a multi-brand microservices casino platform: Fastify API gateway, gRPC, Kafka/RabbitMQ, ClickHouse analytics, 2FA, Dockerized deployments.
- Shipped a match-tracking product end to end, along with config-driven, multi-brand UI systems with role-based access control.
- Built multiple websites and admin panels, backed by a centralized Strapi CMS for content and configuration management.

NeveraTech • Jan 2024 – Dec 2024 Istanbul, Turkiye (Hybrid) • Front-End Developer

- Delivered responsive, performance-optimized web interfaces in collaboration with design and product teams, reducing unnecessary HTTP requests and improving client-side rendering efficiency.
- Standardized component reuse and layout patterns across the codebase, accelerating feature delivery and improving UX consistency
- Took a role in developing mobile applications for multiple clients across diverse categories, from concept to release with React Native.

NeveraTech • Oct 2021 – Jan 2024 Istanbul, Turkiye • Front-End Developer (Part-Time / Intern)

- Implemented responsive interfaces alongside UX/UI teams while completing my degree.

SKILLS

- Frontend:** React, TypeScript, JavaScript, Redux Toolkit, TanStack Query, Next.js, Tailwind CSS, Material UI, framer-motion, i18next, Vite, Webpack
- Real-Time & Games:** WebSocket, socket.io, HTML5 Canvas game engines, provably-fair RNG, game math / RTP, Three.js / WebGL, Lottie
- Backend:** Node.js, Fastify, Express, MongoDB, Redis, gRPC, Kafka, RabbitMQ, REST / Swagger (OpenAPI), JWT & 2FA, Strapi CMS
- Mobile & Native:** React Native (Expo, Expo Router, Reanimated), Swift / SwiftUI (personal projects)
- DevOps & Quality:** Docker, nginx, PM2, Git / GitHub / GitLab, CI/CD, node:test, React Testing Library

LANGUAGES

Turkish (native) · English (B2 spoken production, B1–B2 overall)
